

EECT111

This Introduction to Circuit Analysis class and here are some of the things I learned in this class:

1. I learned about resistors and how to combine them in series and parallel circuit.
2. How to calculate total resistance in series and parallel.
3. How to calculate current.
4. I learned about capacitors and how to combine them in series and parallel circuit.
5. I learned about inductors and how to combine them in series and parallel circuit.
6. Voltage drops across circuits
