

METC111

This is my Statics class and here are some of the things I learned in this class:

1. The differences between vector and scalar operations.
2. Learned about projection of forces along lines.
3. Learned how to create a free body diagram
4. Learned about equilibrium for particles in 2D- and 3-D
5. I learned about moment of force and couple moments
6. I was able to understand Method of joints.
